

Instrument Refresher Course

This all-day seminar & training course will provide the instrument rated pilot with many of the basics of flying under instrument flight rules (IFR). How long has it been since you reviewed the minimum requirements for alternate airports, or even re-evaluated your own personal limitations? Whether you're training to become an instrument rated pilot, or wishing to gain some valuable insight, this special event will combine a variety of topics into a good overview of the basics for IFR pilots. Learn more about the Garmin (G-1000) and the G-400W aircraft.

Come join us as we review a variety of topics, discuss risk assessment, and flying IFR safely in our national airspace system (NAS).

Directions: This event will take place two hangars south of the main Signature Aviation FBO. Enter the hangar under the Civil Air Patrol sign and proceed upstairs.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
